EDUCATION

University of British Columbia – Bachelor of Applied Science, Mechanical Engineering — Expected May 2029

- Co-op availability: 4, 8, 12 or 16 months. Relevant courses: MECH 220, APSC 160, PHYS 170

TECHNICAL SKILLS

CAD & Software: SolidWorks, Onshape, MATLAB, Arduino/C++, Microsoft 365
Design Documentation: Isometric and orthographic engineering drawings
Fabrication & Machining: FDM 3D printing, waterjet cutter, lathe, mill, drill, saw, soldering

TECHNICAL PROJECTS

Maglev Engineering Cairn | UBC MECH — Sep 2026

- Machined a maglev engineering cairn to specified dimensions using mills, lathes, a push-press, saws and files.
- Soldered a custom PCB from provided circuit diagrams.

Cookie Dispenser | UBC Place Vanier — Jun 2026 – Present

- Identified surplus cookie waste at the Place Vanier dining hall and proposed an automated after-hours access solution.
- Designed a fully mechanical, electricity-free dispenser with a one-way mechanism to prevent tampering and intuitive operation.
- Working with the Area President to refine the design for full-time implementation.

Auto Irrigation Device | Personal — Aug 2026 – Present

- Built an Arduino-powered plant-watering system that monitors soil moisture and waters automatically when the soil is dry.
- Designed a compact, pot-mounted enclosure in SolidWorks integrating mechanical and electrical components; now waters family plants in the UAE.

Royal Pop Watch Strap | Personal — May 2026

- Reverse-engineered the Audemars Piguet × Swatch Royal Pop face geometry from dimensional estimates to build an accurate Onshape model.
- Designed a custom pop-and-lock attachment; the 3D-printed strap was manufactured and is used by a friend.

APSC 101 Automated Claw | UBC Applied Science — Jan – Feb 2026

- Designed two specialized autonomous claws (bulk and variety rounds); tested hinge designs with a weighted matrix and produced isometric and orthographic drawings for manufacturing.
- Contributed to Arduino programming and piloted one device: 7 objects in the variety round (goal 5+); team scored above the competition median.

APSC 100 Toothpaste Tower (Assistive Device) | UBC Applied Science — Nov – Dec 2025

- Co-designed a toothpaste-dispensing assistive device (piston dispenser, ratchet-wrench cap opener) in CAD with a team of six for a client with limited mobility.
- Turned client needs into design specifications, scored six concepts in a weighted decision matrix, and revised the pick after catching a flaw; presented it in a technical memo and pitch.

WORK EXPERIENCE

Assistant to Mechanic | Al Joury Auto Repair, Musaffah, Abu Dhabi, UAE — Jun 2023

- Serviced 30+ cars over two weeks in peak summer heat, assisting with oil, brake pad, tire and spark plug changes using hand tools.

LEADERSHIP

Tec de Monterrey House President | UBC Place Vanier — Aug 2026 – Present

- Grew the council's Instagram following from 130 to 300 in one month; Reels earned 65,000+ views over two months.
- Hosted a study night for 10+ attendees; nominated for Of The Month by the Place Vanier Area President.

Founder & President, MISCAD Club | Merryland International School — Sep 2024 – May 2025

- Founded a CAD club and taught 30+ students (Grades 8–12) 3D modelling in Onshape through project-based lessons.

Student Council President & Vice President | Merryland International School — Sep 2023 – May 2025

- Organized school-wide events for 2,000+ students, including Cultural Day and Sustainable Development Goals Week.

Content Creator | Instagram (@ericjoyk, @ericjoybuilds) — Summer 2026 – Present

- Grew an uplifting-content page by 1,200 followers in one summer; multiple reels passed 100K views, with a top reel at 1.486 million.
- Launched @ericjoybuilds, a new account on building things and optimizing life.

VOLUNTEERING

Teacher | Don Bosco Snehabhavan Orphanage, Kerala — Jun 2023 – Jun 2024

- Tutored children in math, science, English and piano over two summer programs; helped prepare and serve meals.

Tournament Volunteer | Emirati Marshals, Abu Dhabi — Dec 2021 – Dec 2023

- Logged 179 hours across five international events, including the FINA World Championships, supporting logistics and athlete registration.

AWARDS

Borouge Competition Winner – AED 5,000 won with a four-person team — 2025

McMaster Award of Excellence – CAD $3,000 entrance scholarship — 2025
